Petitioner alleges that she suffered a shoulder injury related to vaccine administration (“SIRVA”) as a result of receiving an influenza (“flu”) vaccine in her right shoulder on November 13, 2019. Petition at 1. Petitioner further alleges that she suffered the residual symptoms of her injury for more than six months. Petition at 2. set forth in the Vaccine Injury Table ('Table') and the Qualifications and Aids to Interpretation ('QAI') for SIRVA." *Id.* at 6. Respondent further agrees that "petitioner had no history of pain, inflammation or dysfunction in her right shoulder; her pain and reduced range of motion occurred within 48 hours of receipt of an intramuscular vaccination; her symptoms were limited to the shoulder in which the vaccine was administered; and no other condition or abnormality was identified to explain her symptoms. 42 C.F.R. § 100.3(a), (c)(10). In addition, given the medical records outlined above, petitioner has satisfied the statutory requirement that petitioner's injury lasted for at least six months as required by 42 U.S.C. § 300aa-11(c)(1)(D)(i)." *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.
